October, 2021

Dear Hiring Manager,

Currently studying for a Master's degree in mathematical and computational finance at Université de Montréal, I am seeking an internship towards a career into quantitative analysis industry.

I maintained a high GPA during both my undergraduate and current studies, my university curriculum has readied me for the challenges in quantitative methods, algorithm programming, and mathematical analysis. My bilingualism in French and English along with the ability of team collaboration and communication were enhanced by group work, especially two course-based quantitative consulting projects that I participated during my exchange year at University of Ottawa. In order to be better prepared and familiar with the real-world work and career path, I have built vital career skills and industry knowledge by taking virtual experience programs in strategy consulting and data analytics.

I will finish all the required courses by the winter trimester, and my graduate study will end with a supervised (co-op) internship. I am really excited to start my career path in quantitative field here from summer 2022.

Sincerely,

Jingyuan Ma
